## SKILLS

### TECHNOLOGIES SKILLS

Programming Languages:

GoLang • C# • Javascript

Other Technologies:

Temporal • Istio • Docker • Kubernetes

ASP.NET CORE • Entity Framework •

React.js • Next.js • DBMS • Digitalocean

• AWS • Git & GitHub • HTML • CSS •

Bootstrap • Metabase •  $\LaTeX$

## CONTENTS

### ARTICLES

Deploy ASP .NET CORE on Nginx

In this article explained how can you deploy an ASP .NET Core web application on Nginx web server

### YOUTUBE

Discrete Mathematics

Explained in this short videos the fundamentals of discrete structure.

HTTP

Explained the fundamentals of HTTP requests.

version: 3.1.1

last update: 2024-01-26

## EXPERIENCE

### TWEEQ FINANCIAL SERVICES | SOFTWARE ENGINEER

Jun 2023 - Present | 8 mos | Full Time

- Developed Fintech-as-a-Service (FaaS) API for B2B2C model.
- Implemented KYB (Know Your Business) processes for business onboarding.
- Integrated with services including Wathq, Yaqeen, Focal, and Nafath.
- Implemented card limits functionality with customizable daily, weekly, and monthly limits.
- Implemented webhook for FaaS clients to ensure notifications for transaction, cardholder, and account status updates
- Created Slack commands for efficient FaaS client testing.
- Created over 20 operational dashboards to enhance Operation team efficiency.
- Developed dashboards for the Fraud team to monitor and control account activities.
- Stack: Golang, CockroachDB, Kubernetes, Isio, Temporal, Webhook and Kafka.

### AWS | CLOUD INNOVATION CENTER INTERN

Feb 2023 - Present | 5 mos | Internship

- We built a smart storage system (Mirsad) that controls storage access.
- Collaborated with clients to gather requirements and define project scope for a secure storage solution.
- Implemented AWS-based architecture, leveraging cloud services to optimize the infrastructure.
- Integrated IoT sensors into the storage system to enhance security, protecting valuable museum assets from potential threats.
- Developed an algorithm to place artifacts on shelf cases based on dimensions and availability.
- Stack: AWS Services(RDS, Lambda, Amplify, Cognito, API Gateway, IoT Core, and S3) , Next.js and TailwindCss .

### MOYA APP | SOFTWARE ENGINEER

Nov 2021 - Feb 2023 | 1 yr 5 mos | Part Time

- MoyaApp is a platform that connects consumers of water and beverages with the majority of distributors and suppliers in the Kingdom.
- Re-built MoyaApp's dashboard from scratch (ASP .Net).
- Participated in writing the core functionalities of business logic in domains (E-commerce, Operation and logistics).
- Worked with developers to design database schema, and flowcharts.
- Developed advanced Metabase dashboards using SQL to track multiple areas, including:
  - Sales, AOV, GMV and customer segmentation for marketing team.
  - Drivers and products journey to reduce cost of delivery and help operation team.
- Stack: ASP .NET Core, Javascript, Bootstrap, MS SQL Server and PostgreSQL.

### MASADER | OPEN SOURCE CONTRIBUTOR

Jul 2022 - Aug 2022

- The first catalogue for Arabic NLP datasets. Contains 606 datasets
- Improving the front-end codebase and adding features.
- Link to [my contribution](#)
- Link to the [research paper](#)
